

Breakdown of Technical Potential by World Bank Regions

Region	Total Technical Potential	Highlights
Latin America & Caribbean	6.3 TW	Highest regional potential, strong wind resource, good proximity to demand centers
East Asia Pacific	4.4 TW	Strong offshore wind resource, China has the largest potential of any country
Sub-Saharan Africa	2.3 TW	Strong potential primarily in floating wind due to relatively deep waters off the southern coast
Europe & Central Asia	1.2 TW	Favorable conditions in the Black Sea and the Caspian Sea which could become regional markets
Middle East & North Africa	1.1 TW	Moderate resource in Northern Africa, primarily in floating wind
South Asia	306 GW	Some good but limited resources, primarily in fixed foundation offshore wind
